**SAMPLE SHIPPING INSTRUCTIONS**

- Be sure sample collected is a well blended, and homogenous representation of the entire lot.
- Provide sample description as well as specific storage/handling instruction.
- Provide sufficient amount of sample for testing. If not sure, please contact AIB.
- **Provide expected levels for allergens and additives. Failure to do so may delay results and/or lead to additional fees to submitter.**
- Do not use plastic containers (or label with magic marker) for samples to be assayed for pesticide residues.
- Package and ship samples in a manner that ensures their security and quality, and enables easy identification.
- Submit AIB Analytical Request Form with samples.
